

## PAWZ TV – SAMPLE CONTENT

Hi I'm (name) here for Pawz TV. We're out here at the Long Beach Animal Care shelter with another adoption success story.

Today I want to tell you about Lola. Lola was born with a very large hole in her diaphragm, which made it difficult for her to breath. Not only was she in great health danger, but this condition removed any hope of her being adopted.

But thanks to one talented Animal Care veterinarian, Dr. Wood, Lola had a specialized surgery right here, which closed the diaphragm and gave this beautiful young kitty a second chance.

Let's take a look at this cat's journey from medical alert all the way to kitty cuddling.

---

That's our show for today. We had a wonderful time bringing you these adoption success stories, doggie health tips from Dr. Mark, and an interesting conversation with some Long Beach locals about their dog training tips.

Pawz TV is a program funded by the community and produced by volunteers of Friends of Long Beach Animals, celebrating 30 years of helping animals in our community. Please consider donating to our nonprofit by texting PAWZTV to 44321.

See you next time, I'm (name)...adlib
